

› Electric Actuator

Design Character

- Wide voltage : 90~240V AC 50/60Hz
- On-off valve speed, to complete an opening (closing) only 5 seconds
- Automatic clutch device
- Overload protection
- Automatic fault detect function
- Multiterm patents
- Protection class reach up tp Ip67
- Over heating protection device
- The built-in prevent dewing function
- The original sound and light alarm function
- Symmetric design, elegant appearance

Model	: REA-150
Travel	: $90^{\circ} \pm 5^{\circ}$
Supply	: 90~240V 50/60Hz
Ambient temp	: $-20^{\circ} \sim +70^{\circ}$
Enclosure	: IP67
Rated torque	: 150N.m
Rated current	: 1A

High precision
electronic "core"
